Visiting Scholar Colloquium

講題 Model Analysis of Communication Dynamics

講者 Prof. Angelyn Lao (De La Salle University)

時間 2024.6.10 (Mon.) 13:30 – 14:30

地點 Room 115, General Building III

Abstract

Social media has become a critical component in promoting information. The dynamics of communication behave similarly to the spread of viruses and can be studied and analyzed using mathematical models. In this talk, we present different modeling approaches that can be applied to better understand communication dynamics in social media and determine strategies on how to improve or control the dissemination of information.
