

國立清華大學數學系學術演講

NTHU MATH Colloquium

講題 Q-curvature in conformal geometry

講者 何柏通教授 Prof. Pak Tung Ho
(西江大學 Sogang University)

時間 2019.10.21 (Mon.) 16:00 – 17:00

地點 4F Lecture Room B, General Building III

茶會 15:30, R707

Abstract

Q-curvature is a generalization of the Gaussian curvature. In this talk, I will explain about the definition of Q-curvature and some of its properties. Then I will talk about some problems related to Q-curvature, including the problem of prescribing Q-curvature.
